SAVE THE DATE! INVITATION TO THE BROKERAGE EVENT

We are glad to invite you to the AgroFossilFree Brokerage Event!

After almost three years of work, the [AgroFossilFree project](#) has nearly come to an end and has achieved the envisioned targets. The main objective of AgroFossilFree was to pave the way towards the de-fossilisation of EU agriculture by decreasing the dependency on fossil energy while maintaining the yield and quality of the final product and reducing the environmental impact.

A framework has been created to help bridge the gap between the available novel solutions (Fossil-Energy-Free Technologies and Strategies) – whether commercial or applicable research results – and everyday European farming practices. We have published the **AgEnergy Platform** with more than 1.500 entries on innovative techniques, ongoing research and material that in many cases is already available for farmers to use in their fields to produce green energy or save energy. Greater collaboration has been achieved by encouraging the effective exchange of novel ideas and information between research, industry, extension services and the farming community. However, new policies based on the **EU's "Farm to Fork" strategy and Green Deal** must also consider all the progress already achieved.

The [Brokerage Event](#) is an opportunity to present the results that AgroFossilFree has obtained over the last years. If you need any further information, do not hesitate to contact us: agrofossilfree@gmail.com.

REGISTER NOW!

DATE: 22nd June 2023

TIME: 08:30h – 13:00h CET

There will be a networking lunch after the event.
