## INVITATION TO THE 1ST ONLINE WORKSHOP

### AGROFOSSILFREE H2020 EU PROJECT

AgroFossilFree is a project funded by **Horizon 2020** that started in October 2020. The project will create a framework under which all core stakeholders will cooperate to evaluate and promote the currently available Fossil-Energy-Free Technologies and Strategies (FEFTS) in EU agriculture to decrease or even eliminate the use of fossil energy.

We are glad to announce that in a few days we'll celebrate our [1st AgrofossilFree Online Workshop](#).

**DATE** 25th February 2022

**TIME** 10:00h - 11:30h CET

During this workshop, you will have the opportunity to know about the AgroFossilFree project and its milestones. Furthermore, we will present the launching of the [AgEnergyPlatform](#), an interactive tool developed within the project that contains a variety of different FEFTS solutions to help decarbonise agriculture activities.

After that, you will also know the main research results from a study concerning farmers' needs, innovative ideas and interests regarding technologies and strategies for agriculture defossilisation.

Finally, we will listen to three different success stories of three companies using FEFTS.

- [BRITE SOLAR SA](#): a company dedicated to the deployment of advanced nanotechnology materials to create new types of architectural glass that can reduce the energy footprint.
- [THERMODRAFT](#): a spin-off company aiming in research, development and manufacturing of innovative green products and complete solutions.
- [AGCO Corporation](#): presenting interesting FENDT's e100 electric tractor dedicated to Open-field agriculture.

For more information please see below the event agenda.

This workshop aims to be an international meeting place where you will have the opportunity to share interests in real time about clean energy in agriculture and meet other concerns with people from different countries in Europe.

We recommend you to be ready with your mobile phone and connect to this online application.
